

New Internet Technologies

NIT - New Internet Technologies Ltd. has developed an online advertisement system

1

Ads can be free or paid, depending on the users' preferences. They can choose from a variety of categories: Work, Sale, etc.

2

In the system the user can find a free registration form and during the process of the advertisement publication, they may specify the category, title, description, photos, etc.

free registration

-  Category
-  Title
-  Description
-  Photos

3

The search is performed by a standard field, provided with a function for narrowing the range of the displayed results.

4

Our system has an intuitive interface - this greatly facilitates its usage and makes it suitable even for people without experience with similar applications.
